Olympic Marketing – Alain Ferrand
2012-07-26
The Olympic Games have become the definitive sports event, with an unparalleled global reach and a remarkably diverse constituency of stakeholders, from the IOC and International Federations to athletes, sponsors and fans. It has been estimated, for example, that 3.6 billion people (about half of the world population) watched at least one minute of the Beijing Games in 2008 on television. The driving force behind the rise of the modern Olympics has been the Olympic marketing programme, which has acted as a catalyst for cooperation between stakeholders and driven the promotion, financial security and stability of the Olympic movement. This book is the first to explain the principles of Olympic marketing and to demonstrate how they can be applied successfully in all other areas of sports marketing and management. The book outlines a strategic and operational framework based on three types of co-productive relationships (market, network and informal) and explains how this framework can guide professional marketing practice. Containing case studies, summaries, insight boxes and examples of best practice in every chapter, this book is important reading for all students and practitioners working in sports marketing, sports management or
Digital communication is significantly expanding new opportunities and challenges in the tourism industry. Tourists, now more frequently than ever, bring their smartphones with them to every destination, and cultural tourists are particularly motivated to utilize a variety of services and platforms as they are especially open and interested in understanding in detail the places and heritage of the places they visit. Thus, researchers, educators, and professionals in the tourism and hospitality field should take advantage of this opportunity to propose new ways of presenting better content and creating a more immersive and optimized experience for tourists. The Handbook of Research on Digital Communications, Internet of Things, and the Future of Cultural Tourism shares research and experiences on the convergence between digital communication and cultural tourism, specifically the migration and creative appropriation of these technologies for increased tourist engagement and their role in destination marketing and strategic planning and decision making. Covering topics such as big data, e-tourism, and social media platforms, this major reference work is an invaluable resource for researchers, students, professors, academicians, government entities, museum managers, professionals, and cultural tourism managers and facilitators.

Marketing Management - M. C. Cant
2009

Focusing on the environment, market research, buyer behavior, cyber marketing, and positioning, this newly revised edition based primarily on South African companies provides a comprehensive overview of marketing theory.

Inhaltsangabe: Introduction: Overview: This chapter will introduce the reader to ambush marketing together with identification of gaps in the current research. Further, this chapter will formulate resulting problems for managerial decisions and consequently propose research objectives. Finally, a brief overview of the methodology together with delimitations will be detailed.

Background to the Research: The increased use of ambush marketing in the last decade as a form of communication is widely acknowledged (Brewer 1993; McKelvey 1994; Meenaghan 1994, 1996 and 1998; O Sullivan and Murphy 1998; Sandler and Shani 1989; Shani and Sandler 1998 and 1999). The reason for the increased activity relates to clutter in the marketing communications environment and increased prices for sponsorship. Ambush marketing can be
defined as the practice whereby another company, often a competitor, intrudes upon public attention surrounding the event, thereby deflecting attention toward themselves and away from the sponsor (Meenaghan 1994, 1996 and 1998). To date, most literature on ambush marketing relates to whether ambush marketing is ethical or not (Brewer 1993; Ettorre 1993; Meenaghan 1994 and 1996; O Sullivan and Murphy 1998). A clear answer cannot be given, as there is still a dispute between opponents (Brewer 1993; Ettorre 1993), supporters (Schmitz 2005; Welsh in Brewer 1993; Welsh 2007) and opinions that lie in between (Doust 1997; Meenaghan 1994 and 1996; O Sullivan and Murphy 1998; Shani and Sandler 1998). In general, there is an agreement that the term ambush marketing was coined by Jerry Welsh in the 1970s (Brewer 1993; Welsh n.d.). In a marketing framework, ambush marketing is commonly placed among non-traditional marketing communication as opposed to traditional marketing communication (Meenaghan 1994, 1996 and 1998). A commonly acknowledged framework of these new marketing tools is not yet established, and the effects of ambush marketing have received limited attention. To date, the most reliable research relates to effectiveness of ambush marketing, as well as recall and recognition tests on sponsors and ambushing competitors (Sandler and Shani 1989). These tests compare official sponsors with the equivalent ambush companies of an industry. Research on image and sales has not yet been undertaken in relation to ambush marketing (Meenaghan 1998). However, there have been attempts to investigate the effects of ambush marketing on consumer [...]
Marketing: A Relationship Perspective is back for a second edition and continues to set a benchmark for achievement in introductory marketing courses across Europe. It is a comprehensive, broad-based, and challenging basic marketing text, which describes and analyzes the basic concepts and strategic role of marketing and its practical application in managerial decision-making. It integrates the 'new' relationship approach into the traditional process of developing effective marketing plans. The book's structure fits to the marketing planning process of a company. Consequently, the book looks at the marketing management process from the perspective of both relational and transactional approach, suggesting that a company should, in any case, pursue an integrative and situational marketing management approach. Svend Hollensen's and Marc Opresnik's holistic approach covers both principles and practices, is drawn in equal measure from research and application, and is an ideal text for students, researchers, and practitioners alike. The seminar was an endeavour to provide platform to all the academicians and practicing managers to interact together and discuss the course of action that businesses and technology needs to take to combat the fast changing global business scenario.

Social Marketing in India - Sameer Deshpande 2013-10-31

This book, an adaptation of Nancy R. Lee and Philip Kotler’s highly successful book Social Marketing: Influencing Behaviors for Good, 4th Edition, is structured around the ten-step marketing planning process that trains and encourages those in positions responsible for influencing public behaviors to undertake a systematic and comprehensive approach to behaviour change rather than jumping to the stage of producing just ads or distributing condoms. The book will convince readers when employing social marketing, it takes more than this. The book illustrates the planning process, importance of research, and related concepts through numerous examples that are of high quality and diverse contexts. It is one of the first books to bring together excellent social marketing thoughts related to the Indian situation at one place. Through these discussions, the book proposes new ways to address old problems related to public health, injury prevention, environment protection, community harmony, and financial well-being. In a nutshell, if you want to learn how to fix India’s problems, this book is
A thorough update to a best-selling text emphasizing how marketing solves a wide range of health care problems. There has been an unmet need for a health care marketing text that focuses on solving real-world health care problems. The all new second edition of Strategic Marketing for Health Care Organizations meets this need by using an innovative approach supported by the authors' deep academic, health management, and medical experience. Kotler, Stevens, and Shalowitz begin by establishing a foundation of marketing management principles. A stepwise approach is used to guide readers through the application of these marketing concepts to a physician marketing plan. The value of using environmental analysis to detect health care market opportunities and threats then follows. Readers are shown how secondary and primary marketing research is used to analyze environmental forces affecting a wide range of health care market participants. The heart of the book demonstrates how health management problems are solved using marketing tools and the latest available market data and information. Since the health care market is broad, heterogenous, and interconnected, it is important to have a comprehensive perspective. Individual chapters cover marketing for consumers, physicians, hospitals, health tech companies, biopharma companies, and social cause marketing – with strategies in this last chapter very relevant to the Covid-19 pandemic. Each chapter gives readers the opportunity to improve marketing problem-solving skills through discussion questions, case studies, and exercises.
